Impact

Scalable, Stable, Reliable Solution.

Challenge

A leading e-commerce retailer specialized in selling diet food programs faced multiple technology challenges including latency, outages, inconsistency with their existing framework causing inefficiencies. The new technology solution would need to be scalable, in addition to being stable, consistent and reliable

NuSolution

- NuWare re-assessed existing framework; recommended AWS technology solutions for increased flexibility, stability and reliability
- Created and developed a well-defined architecture framework to address latency, outage; resulting in faster and better production deployments
- Implemented a scalable model in both web & mobile to support continuous integration with third party tools and ensure stable infrastructure
- Built security firewall on top of AWS framework for improved safety and a secure environment

Impact

NuWare's implementation of the AWS Solution led to improved stability, consistency and reliability of the system. The client realized instantaneous benefits, including a boost in performance owing to the revamped architecture, re-assessed storage plans and better security. De-commissioning outdated technology and leveraging AWS cloud solutions enhanced overall efficiency, helping the business to grow and scale. A significant increase in customer base was noted
